

Dear Representative Feenstra,

The Farm Bill could be a great boon to Iowa if it would:

- Reduce hunger and improve nutrition by supporting SNAP benefits.
- Reduce carbon emissions and protect water, land, and biodiversity from degradation.
- Limit animal feeding operations (CAFOs) to protect communities and water sources.
- Incorporate provisions of the Justice for Black Farmers Act (118th Cong. S.96) which would restore land lost due to past discrimination and help a new generation of Black farmers.
- Ensure the health, safety, and fair compensation of those who work the land and pick the produce on which we all depend.

Dear Representative Feenstra,

The Farm Bill could be a great boon to Iowa if it would:

- Reduce hunger and improve nutrition by supporting SNAP benefits.
- Reduce carbon emissions and protect water, land, and biodiversity from degradation.
